

# MPT

COMPRESSION PACKING  
PROCESSING MACHINES

**MPT 21**

## **AUTOMATIC BRAIDED PACKING CUTTING MACHINE**

**Section: min. 6x6mm - max. 30x30mm**  
**30° to 90° cut - Special oblique cuts -**

The MPT21 braided packing cutting machine automatically cuts at a programmable length braided packings with different sizes and shapes. It is also possible to add a second angle, making an oblique cut with two combined angles up to 45°+45°, making the packing resistant in two directions (flange compression and blowout).

The machine is also able to achieve sharp cuts with braided packings with stainless steel wire reinforced.

**MPT 22**

## **AUTOMATIC BRAIDED PACKING CUTTING MACHINE**

**Section: min 6x6mm / max 30x30mm with 45° cut;**  
**25x25mm with 60° cut**  
**45° to 60° cut**

The MPT22 braided packing cutting machine automatically cuts at a programmable length braided packings with different sizes and shapes. The machine is also able to achieve sharp cuts with braided packings with stainless steel wire reinforced.

## MPT 70

### AUTOMATIC PRESS WITH SINGLE MOULD FOR GRAPHITE RINGS

**70 tons pressing force**  
**Max 120 mm Ø**

MPT70 machine produces die formed rings using graphite tape or other similar material.

It can work in two modes:

- a) Semiautomatic: the operator feeds manually the pre-cut tape of graphite.
- b) Fully automatic: the graphite feeding is performed automatically by the machine.

All the machine functions and product parameters are controlled by a PLC, with panel programming.

## MPT 23

### PNEUMOHYDRAULIC GOOSEN PRESS WITH FOUR MOULDS FOR GRAPHITE RINGS AND BRAIDED PACKINGS

**13 tons pressing force**  
**Max 112 mm Ø**

MPT23 machine produces die formed rings using wound graphite tape (see also MHG03A machine) and braided packings using braided packing (see also MPT21-MPT22 machines). It can work in manual or automatic mode. Flexible use: Ideal for high production using all 4 stations and low production using only 1 station. The pressing can be single or double for each station.

## MPT 25

### AUTOMATIC WEIGHING MACHINE

**Precision digital scale**  
**1/1000 g resolution**

Perfect density of your gasket automatically controlled and selected through a precision scale.

It can be used as a stand-alone machine or incorporated into any packing press model.

MPT25 weighing machine is complementary to MPT70 and MPT23 machines.
